

Final Day Harvest Learning Village Statenburg 2012

Wisdom nuggets

We are hosting the global process of the great transformation

How many apples are in a human connection

Our connection to „outer world“

The new structures have to arise through „us“ from the core of the earth

Simple
Joy
Generosity

Let there be love & everything flows

Keeping the inner & outer eyes open

Exploring the common unity with all the nationalities is the essence of humanity

The centre is everywhere - as long as we tend to it

There is joy in giving and strength in sharing

Communication with space/place = hosting community

About oneself:
host, be, share:
what can I give?

The strudels of deep conversation should be balanced with the vegetables of play

Opening up subtle sensing and transforming energies

Healing + coming into flow of male/female energies

Intentional wishing works

Warm the house, sense the place

Welcoming dissonances

Problems as a chance

Nothing to do but to offer your gifts lightly

It's courageous work to be open

Open-heart - respond to what calls you

learning

Importance of question

awareness of choice (in every moment)
The world offers us everything but gives us nothing that we don't accept

Discomfort (illness, arriving late etc.) is an opportunity to stop relying on habitual coping strategies

This is a journey ...

... of „jumping over the shadow“
(assumptions about Slovenia/Yugoslavia, logistics/hosting team, money ...)

... of finding the potential to magnify the magic of the learning village

.. of joyfully dancing with shadow & light into our power & gifts to the world

... on individual and collective potential

Through practicing we manifest more of the potential of a healthy village

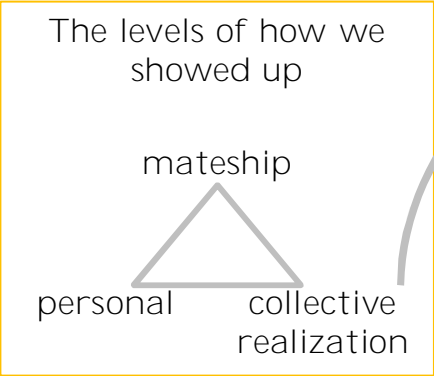

... of synchronization through mutual support to resonate with the whole

... of coming into our own individual & collective shoes, accept them and walk with them

... of creating a „being“ that does not dissolve when „we“ leave

... of joyful nakedness in a trusting safe space and awareness of the wider system belonging

... of finding our gift & place in the community in every moment and overcoming the fear to really deeply connect

Collective realization needs some form of hosting

... on how we want to be together

... of emptying!

The beginning of a series of learning villages

... of consciously living connectedness by integrating all aspects of life

... towards peaceful coexistence
